

If You Answer “Yes” You Might Have a Technology Inventory Problem

2 of 6 in a Tangoe infographic series on Inventory Management

STUCK WITH SPREADSHEETS

Do you use spreadsheets to track telecom, IT, and mobility details?

Business Process Automation a Top Priority

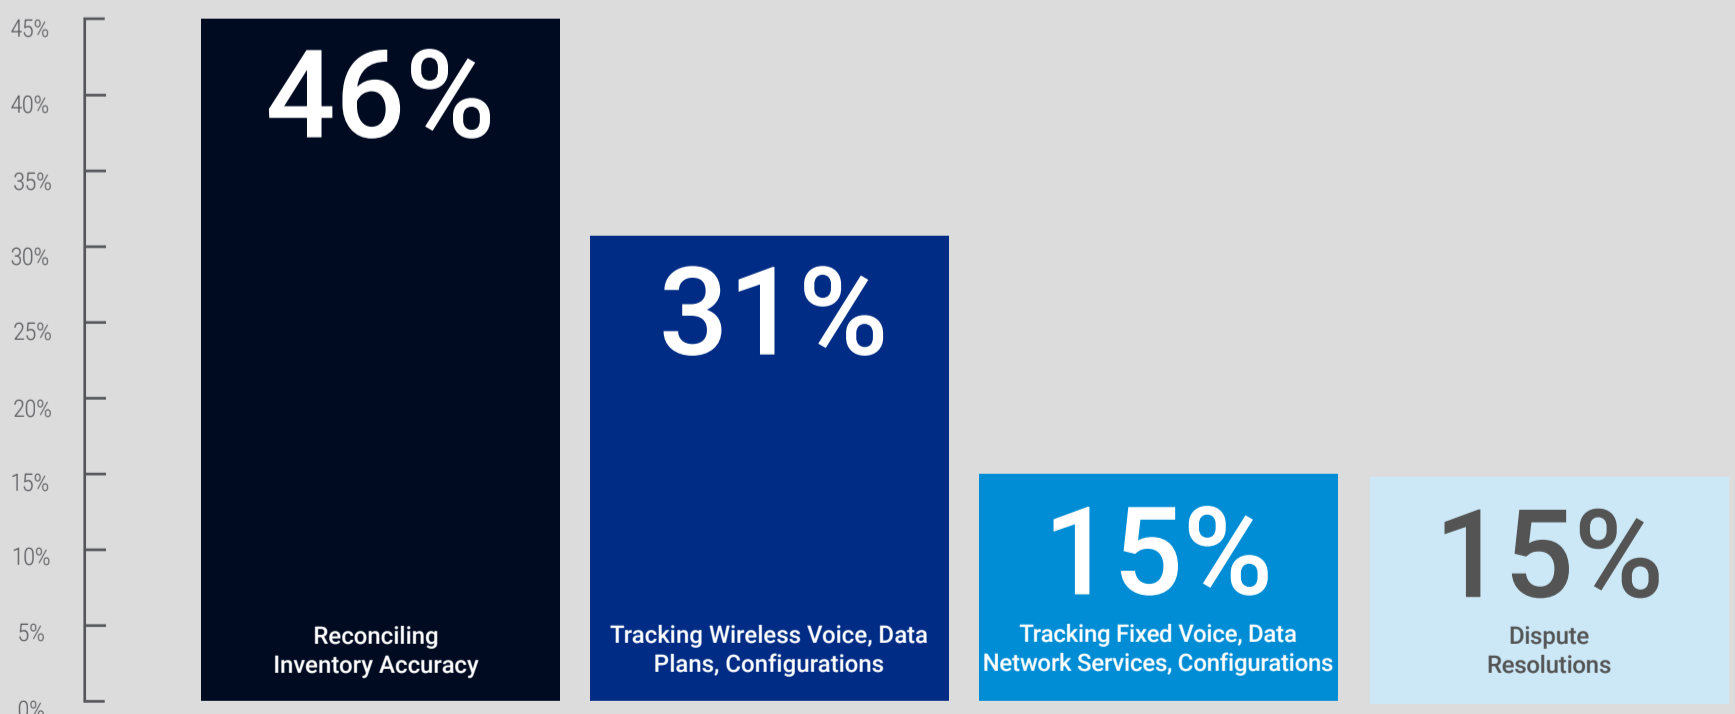

31%

of CIOs ranked business process automation as the most critical automation effort for their organization in the next 3 years.

According to Tech Pro Research:

“Accelerating automation will be a key building block enabler for digital business. Not only will it increase the provisioning speed for needed infrastructure resources, but it will also **increase service availability through the reduction of human error, which is a major cause for outages.** CIOs must stress the importance of increasing automation throughout their organizations.”

Service Inventory Management Activities Taking the Most Time

Organizations that reduce manual inventory management processes increase accuracy and alleviate burdens on internal resources.

To find out more about automating your inventory management processes, get [AOTMP's white paper](#) on addressing the telecom-IT inventory conundrum.
