

# If You Answer “Yes” You Might Have a Technology Inventory Problem

6 of 6 in a Tangoe infographic series on Inventory Management

## LACK OF AUTOMATION

Do you have to manually classify, sort, and manipulate service details from each carrier to normalize across vendors or is inventory information in electronic form unavailable from 1 or more of your carriers?

Gartner

## Productivity a High Priority

# 42%

Increasing productivity through technology a major IT budget priority for 42% of IT professionals

According to AOTMP:

“Manually classifying, sorting, and manipulating service details from each carrier introduces a **large margin for error, burdens internal resources, and jeopardizes inventory validation efforts.**”

## Substantial Cost Savings

# \$104M

Amount saved by Tangoe customers since March 2017.

Tangoe customers have saved \$104M since March 2017 across the board by overcoming inventory challenges and implementing best practices.

Discover more inventory management best practices by accessing [AOTMP's white paper](#) on addressing the telecom-IT inventory conundrum.
