

# LOGISTICS

Tangoe goMobile helps enterprise mobility efforts secure a complete asset lifecycle.

Our logistics services enable you to deploy, provision, configure, kit, and manage global asset initiatives from one centralized software system.

### PLAN

Evaluate, design, and adjust your deployment framework to satisfy enterprise needs. Tangoe’s agile approach makes warehousing and inventory data management successful at any complexity or scale.

### DELIVER

Optimize freight management to ensure users receive their assets when and where they need them. Tangoe’s automated notifications help you track devices at every step.

### SOURCE

Integrate catalogs and systems to improve user experiences. Tangoe’s single-invoice solutions eliminate internal mobility management tasks.

### RETURN

Return, repair, recycle, or destroy assets and data to make inventory management easier than ever. Tangoe’s automated workflows upgrade enterprise agility and security.

### MAKE

Deliver secure and configurable asset testing and kitting solutions. Tangoe’s global reach and partner network enhance process efficiency to accelerate replenishment.

How can Tangoe optimize your mobile technology solution?
