

# Ensure the Success of Network and Technology Transformation Initiatives

**Tangoe Advisory Services - Transformation:**  
Global Methodologies, Expertise, and Support

Companies must adapt to growing Line of Business (LOB) demands for network transformation or risk failure to meet critical business requirements. Few companies have the resources and expertise to lead successful network transformation initiatives internally. The **Tangoe Advisory Services (TAS) Transformation** solution serves as a partner to identify, prepare for, implement, measure, and monitor these network transformation projects.

The TAS Transformation solution supports companies in the successful transformation of network infrastructure. This solution unites a global methodology for data gathering, inventory management, and baselining with expertise in carrier offerings, technologies, and best practices to evaluate and support the implementation of network transformation projects.

## Core Tactics and Services

Network infrastructure transformation initiatives require a variety of skills and years of experience to ensure success. The complexities of data gathering on a global basis, understanding service provider solution technologies, and implementing best practices to ensure success are daunting challenges for most enterprises.

Ensuring a new network is seamlessly integrated into an enterprise's expense management program to measure results

### Key Challenges

- Visibility into global costs, service providers, and current baselines
- Access to data on global carrier offerings, technologies, and best practices
- Understanding transformation opportunities and modeling the impact
- Managing and mitigating inherent transformation risks
- Baselining current costs and measuring transformation ROI on a global basis

### Benefits

- Development of initial infrastructure service baseline and cost model
- Guidance on vendor solutions, options, and risk
- Identification of transformation opportunities to meet developing LOB demands
- Financial models to understand and monitor impact
- Management of service migration and measurement of results

and provide ongoing financial assurance is an additional obstacle. A clear understanding of the current environment and migration strategy is key to choosing the right solutions and mitigating transformation risks.

Our TAS Transformation solution provides the expertise and global methodology needed to succeed in network infrastructure transformation projects. The solution is integrated with pre- and post-expense management solutions to measure and

monitor the transformation's success. It is executed by a team of experts with extensive experience in baselining, interpreting, and normalizing service provider data on a global basis using local resources. The solution can also be leveraged by our alliance partners that have transformation practices including data discovery, global baselining, benchmarking, and third-party contract negotiating.

## Tangoe Advisory Services Overview

Tangoe Advisory Services provides three distinct solutions (sourcing, transformation, and consulting) to aid companies in the successful implementation and management of effective, customized expense management strategies. These solutions are designed to support the procurement of world-class service provider contracts, the implementation and success of transformation initiatives, and the application of expense management best practices.
