

Unified Analytics

by Tangoe One

Say hello to Unified Analytics by Tangoe One—a single, consolidated view of all executive-level data in one place. It’s the “big-picture” reporting and holistic overview of technology expenses, inventory, and device usage you’ve been waiting for, without the hassle.

The Challenge

Gartner forecasts that by next year, “the share of knowledge workers working remotely will increase from 27% in 2019 to 45% in 2022, driving permanent change in workforce structure.”

SOURCE: GARTNER (2021)

Today’s global, work-from-anywhere environment and dynamic market landscape have accelerated the adoption of new digital communication channels (e.g., Teams, Zoom, etc.), cloud assets, mobile devices, and telecom network transformation. As the freneticism continues, decision-makers across all industries—from enterprise finance and IT executives to business line managers—are struggling control growing technology expenses and stay mindful of total spend.

The lack of visibility and control over what technology expenses, inventory, services and usage not only impacts a company’s bottom line, but also makes it vulnerable to legal and compliance issues - including fraud, abuse, misuse of services, and security breaches.

After all, how can you accomplish trend and forecasting analysis and answer “what-if” scenarios about tomorrow, without complete transparency into technology expenses and inventory today? Taking things a step further, how is it possible to take proactive measures to safeguard your employees, company, and bottom line to actively mitigating potential financial, legal, compliance, reputational or security risks?

Our solution: A unified, high-level window into your telecom assets and expenditure, accessible anywhere, anytime.

Tangoe One Unified Analytics empower you to...

Work smart:

Access a holistic view of telecom, mobile and cloud expenses and inventory quickly from one central location whenever strategic decisions are to be made.

Save money:

Monitor cost and usage spikes, make projections, and retrieve critical insights into trends helping to streamline spending and right-size programs with confidence.

Be confident:

Deliver the right information to Business Line Managers to better track overall spend, bringing greater transparency and visibility to the business.

Featured Dashboards and Benefits

Unified Analytics provides greater visibility into your telecom, mobile and cloud estate to fuel strategic decision-making and bring confidence to technology expense management.

Here's What You Get:

- **Spend High-Level**—Offers a top-down view of enterprise-wide expenses in multiple categories
- **Spend Trend Details**—Provides month-over-month spend by service area, charge category, and charge type with variance highlights
- **Spend Asset View**—Helps you understand assets and budgetary impact
- **Spend Vendor View**—Provides the full story on spend
- **Cost Center Details**—Facilitates cost control and management within departments
- **Inventory Details**—Allows for categorization of assets as needed
- **Location Details**—Delivers a geographical understanding of spend and assets

Key Application Benefits:

- View expenses across asset and service types (telecom, mobile, cloud)
- Complete cost center and financial pictures
- Global and regional sorting
- Greater visibility into potential issues; be alerted to problems before they escalate
- Tracking of audit savings
- Increased budgeting, trending, forecasting
- Answers to “what-if” scenarios

By implementing Tangoe One's Unified Analytics, companies don't waste time toggling between screens to get the information you need, when you need it. Trade in your information silos for a single source of truth. Armed with the full story, you'll finally fill in the gaps and cost management gray areas with facts—entering high-level budgetary conversations more informed than ever before.
