

# Tangoe One Cloud IaaS for Mid-Enterprise

No matter the size of your organization, cloud costs, consumption and security risks continue to grow. You need to be prepared to handle the challenges that come with implementing applications like AWS, MS Azure and Google Cloud so that your investment doesn't outpace business growth. Through the Tangoe One Cloud IaaS solution, we help enterprises of all sizes gain visibility and control over their infrastructure, identify cost savings, free up IT resources and operationalize their cloud migration efficiently in order to achieve their digital transformation goals

## What does Tangoe's Cloud IaaS solution do for you?

Building upon decades of experience in expense management, Tangoe's allows you to manage, track, analyze and optimize all cloud infrastructure expenses, assets and usage in one easy-to-navigate application. Gain full control and visibility over your multi-cloud technology stack, allocate and chargeback costs tagged to the right cost center, understand usage spikes, and unleash the power of AI optimization to reveal instant cost saving opportunities based on over 500,000 different pricing schemas. We don't just show you dashboards. We provide actionable insights you can implement right away.

### SIMPLIFY

Simplify your cloud infrastructure with essential tools that eliminate manual tasks. With embedded automated workflows, client driven business rules, and standardized data you can easily link all IaaS expenses to the appropriate assets and cost centers.

### MANAGE

Manage IaaS efficiently with customized reporting, analytics and daily alerts to help you respond to potential concerns. Proactively identify trends, gaps in tracking utilization, forecasting, and more. Gain complete visibility and control to achieve successful outcomes with speed and accuracy.

### OPTIMIZE

Optimize your IaaS spend and resources by getting instant, automated cost savings and recommendations that will help you scale or right-size your business, allocate resources, and get the most value from your IaaS investments.

### SECURE

Secure your cloud ecosystem with strict governance protocols to strengthen compliance and security, eliminate overspending and protect your business and intellectual properties.

# IaaS Cloud expense management & optimization done right.

## Invoice Processing

Automated, customized, on-time invoice acquisition, validation, approval and tagging workflows to avoid late fees.

## Inventory Analysis

View and analyze all billed cloud IaaS assets in one central location across vendors.

## Expense Management

Cost allocation, chargebacks, AP/GL integration, account tracking and reporting of spend delivered daily.

## Notifications & Monitoring

Instant notifications based on established usage or spend threshold overages for proactive action and continuous monitoring

## Direct API Integrations with IaaS Vendors

Tangoe IaaS Cloud solution allows you to integrate directly with AWS, Azure, GCP, and Oracle to automatically pull data daily. Stay current and have the ability to control and enrich the data of your customer's specific financial and visibility rules.

## Powerful Reporting & Analytics

Advanced, near real-time, on-demand and customized reporting for authorized users that drills down to every detail, providing visibility into your IaaS expenses, assets and usage in one platform, allowing you to get as granular or high-level reporting as necessary.
